🏠 Turkey/Nigde – TRNC/Lefkosa

## PROFILE

I approach problems with an analytical and research-oriented mindset, always eager to explore new technologies and transform ideas into practical applications. With a strong focus on detail, adaptability, and teamwork, I strive to create sustainable systems while continuously improving my knowledge and engineering skills.

## EDUCATION

**Near East University**            **2016-2022**
Bachelor's degree in Computer Engineering

## SKILLS

**Backend:** Python (Django, DRF), C#, Node.js

**Frontend:** HTML5, CSS3, JavaScript (jQuery, AJAX), Bootstrap, React, Typescript

**Databases:** MSSQL (T-SQL), MySQL, PostgreSQL

**Architecture & Design Patterns:** Domain-Driven Design (DDD), N-Tier Architecture, Clean Architecture, Real-time Communication (WebSocket), Caching Strategies (Redis, In-memory)

**Tools & Practices:** Git/GitHub, Docker, Nginx, REST API, Postman, Unit Testing, Agile (Scrum, Jira)

**Soft Skills:** Teamwork, Leadership, Communication, Problem-solving, Analytical Thinking, Adaptability

## LANGUAGES:

**Turkish** *(Native)*

**English**

**German**

## PROFESSIONAL EXPERIENCE

**NEAR EAST TECHNOLOGY | Backend & Full-stack Developer**
*10.2024 - Present*

Worked on multiple large-scale projects (restaurant management, sports facilities, and education platforms), focusing on scalable web systems, real-time integrations, and enterprise-level architecture.

**BEY VENTURE YAZILIM VE BILISIM TEKNOLOJILERI LTD. STI.**
*06.2023 – 12.2023*

I worked as a Software Test Engineer on a large-scale project, gaining experience in software testing stages and Agile methodology.

**HANZADE YAPI, TARIM VE HAYVANCILIK**
12.2022 – 05.2023

I improved the company's website by adding new features with HTML, CSS, Bootstrap, Angular, JavaScript, and Java, while also learning the use and principles of storage and accounting programs.

# PROJECT EXPERIENCE

**Pizza Pizza Cyprus – Restaurant Management System**
Built a scalable multi-branch restaurant management platform with real-time order tracking and role-based access.
• Branch-specific menus, orders, and user roles (Admin, Manager, Call Center, Cook, Courier, Cashier, Customer)
• Real-time tracking with WebSockets & Redis, advanced menu system with dynamic pricing
• Tech stack: Django REST, React + TypeScript, Docker, Nginx, JWT
*Impact:* Supported high-volume operations; strengthened expertise in scalable architectures

**Near East Sports Tower – Sports Facility Platform**
Developed a web platform with turnstile integration for real-time entry tracking and member management.
• Real-time monitoring, responsive UI, secure backend with Django REST + PostgreSQL
*Impact:* Streamlined facility operations; gained hardware-software integration skills

**Near East Olympic Pools – Swimming Facility Platform**
Created a web system for membership and access control with turnstile integration.
• Multi-pool membership management, entry/exit tracking, Django REST + MySQL backend
Impact: Boosted operational efficiency; experience with complex integrated systems

**Near East College – Education Platform**
Maintained and enhanced modules for primary, middle, and high school management.
• Debugged and improved course, service, and accounting systems
Impact: Increased stability of critical education modules; expertise in large-scale system maintenance
